State and Federal laws

- In 1955 the Legislature established courses of study, and in 1974 determined their approval to be required by the state's Board of Education.
- The Legislature sought to establish a state assessment in math and reading in 1984.
- South Dakota established common course standards in 1995.
- First statewide mandatory testing was in 1999. The Dakota-STEP tests began in 2003.
- South Dakota's Board of Education voted to adopt the Common Core standards in 2010.
- In 2015 the state administered its first "Smarter Balanced" assessment.
 - Testing is a federal requirement under Every Student Succeeds Act (ESSA)
 - Scores reflected the standards were higher than with Dakota STEP
 - Established key measures as 3rd grade reading, 8th grade math, Improved Native American Achievement and College and Career Readiness
- The Department and ESSA Plan stakeholders may revise our plan annually.

How are we doing?

So what's happened?

- This year, South Dakota's average ACT score tied for 1st place among 26 states with over 50% participation
- ELA college readiness goals for "All Students" (GOAC Performance Measure) were met
 - five years ahead of schedule
- Math college readiness goals are 1% point away from meeting the goal we set for 2023.
- NAEP 4th grade reading average score indicates SD is slightly higher than national average
- NAEP 8th grade math average score indicates we tied for 6th in the nation
- English Language Learners considered "on track" improved 12% from last year

How are we doing?

But . . .

- 3rd grade reading and 8th grade math remain where they were four years ago (SD Assessment)
- Different groups of students, such as Native American and economically disadvantaged, are not achieving and the gap is widening
 - What does this mean?

Every Student Succeeds Act

South Dakota
Report Card 2018-19

The graphic shows five children from behind, each with a backpack, reaching up to interact with various space-themed icons: a rocket, a planet with rings, a star, an astronaut, a satellite, and the Earth. The children are holding colorful markers, suggesting they are drawing or interacting with these elements.

2018-19 Public School Information

What is a Report Card?

The South Dakota Report Card is intended to share important information about the state's public schools. It encompasses a variety of indicators that contribute to school performance. Browse the links below to learn more.

ELA - Grade 3 Proficiency Levels

All Full Academic Year Students - SD Assessment Scores SY 2018-19

Economically Disadvantaged Students – SD Assessment Scores

■ L1 ■ L2 ■ L3 ■ L4

910 students needed to get to 54% goal

As of 29 August 2019

So, where do we begin?

- The annual SD assessment tell us what needs support
- Focus on the Opportunity Gap and the unique issues in Native American education
- with incentives to select the best Knowledge rich curriculum aligned to state standards,
- Evidence-Based Practices that :
 - Support Educators,
 - Support and empower high quality principals,
 - enhancing teacher preparation programs,
 - advocate for education's value and role in our state's life and economic future for the common good
 - Public, non-public, homeschool
 - While continuing high standards for all students

DOE and BOES Authorities

- SDCL Title 13 authorizes the Secretary and the Board of Education Standards to:
 - Set academic standards, accredit public and non-public schools, determine teacher and administration certification standards, set teacher preparation program requirements, K-12 graduation requirements with “rigorous high school curriculum” of the school districts’ choosing.
 - Pass through agency for state and federal funds
 - Without accreditation, the school district will not be provided state aid
 - “Nothing in this section authorizes the board to require the use of specifically designated curriculum or methods of instruction.”

State and Local have different roles

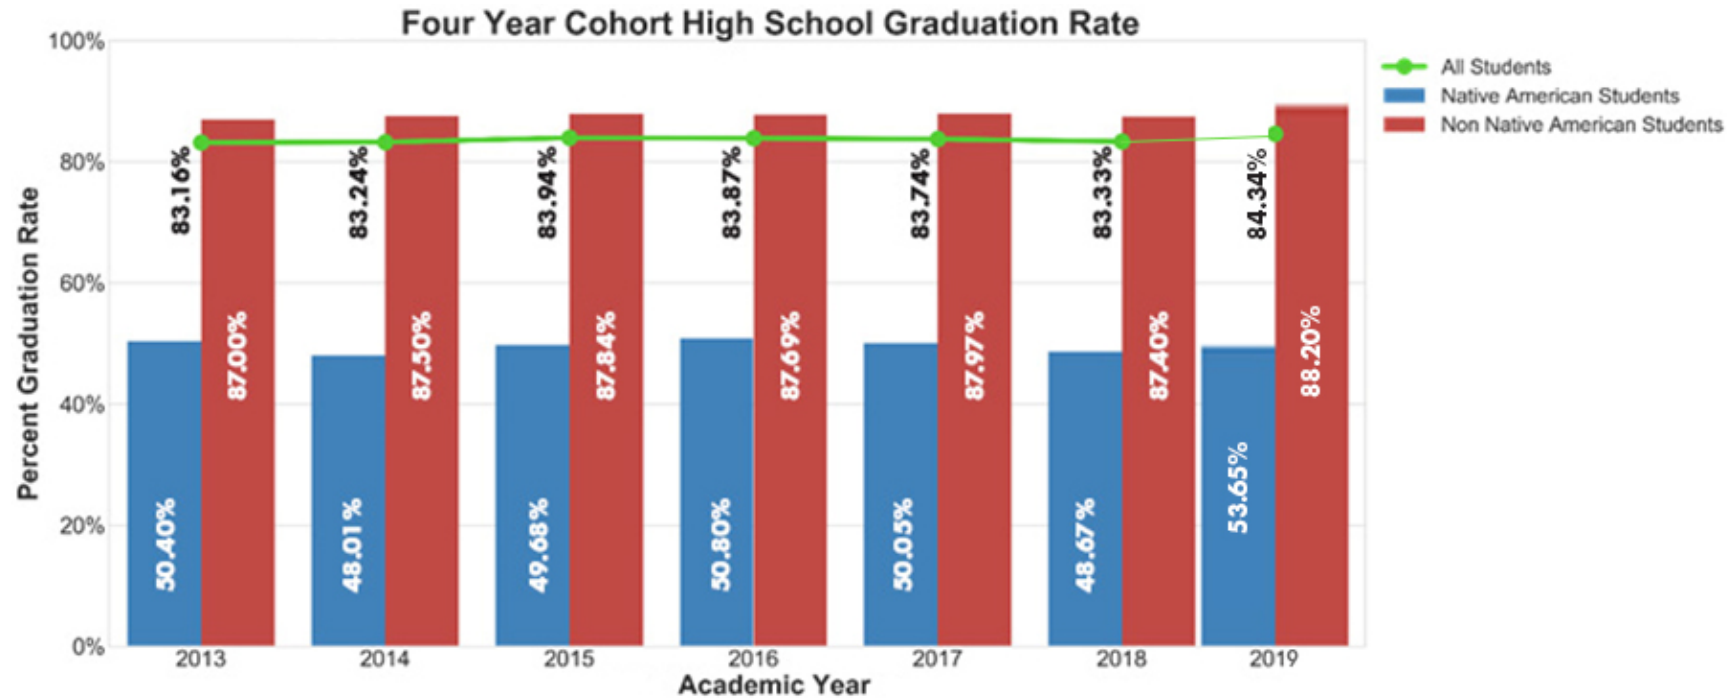

“So the secretary *defines* what education *is* and the school districts *provide* that education.”

- A Brookings high school student, May 15th, 2019

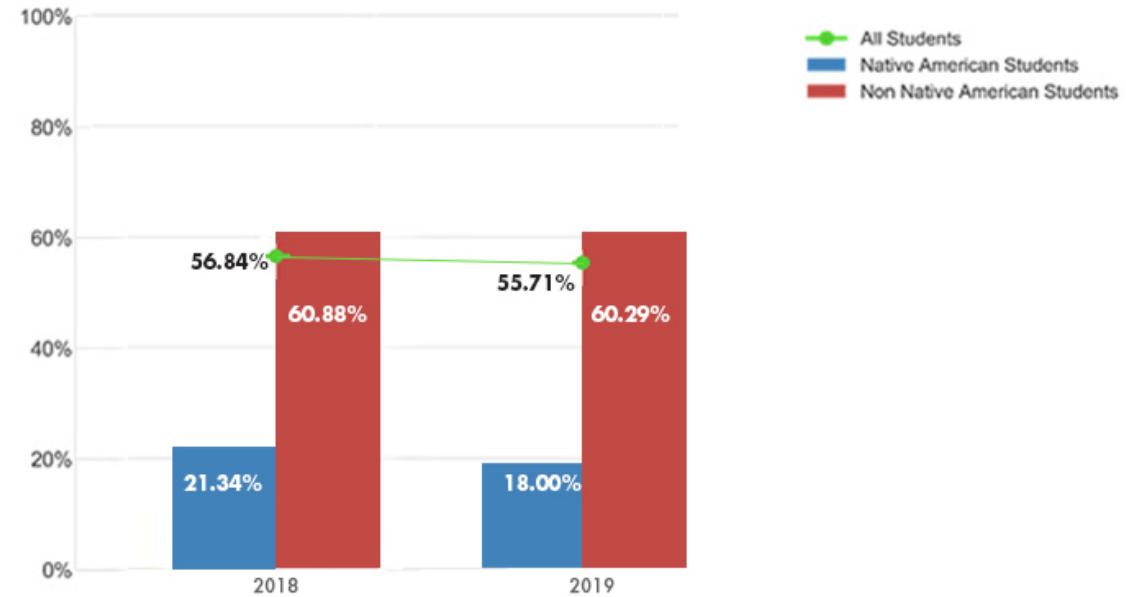

Statutorily defined roles:

- Academic Standards - State
- Academic assessment – State and Federal
- Accreditation, Probation, and Suspensions - State
- Teacher Certification - State
- Accountability (CSI and TSI plans) according to our state ESSA Plan – federal and state
- SPED support, policy, and grants management – Fed and state
- Fiscal management – state with some federal oversight
- School meal program and grants management with US Dept of Agriculture - federal
- State Library support to community and school libraries - state
- Historical Society outreach to the public and schools – state and private

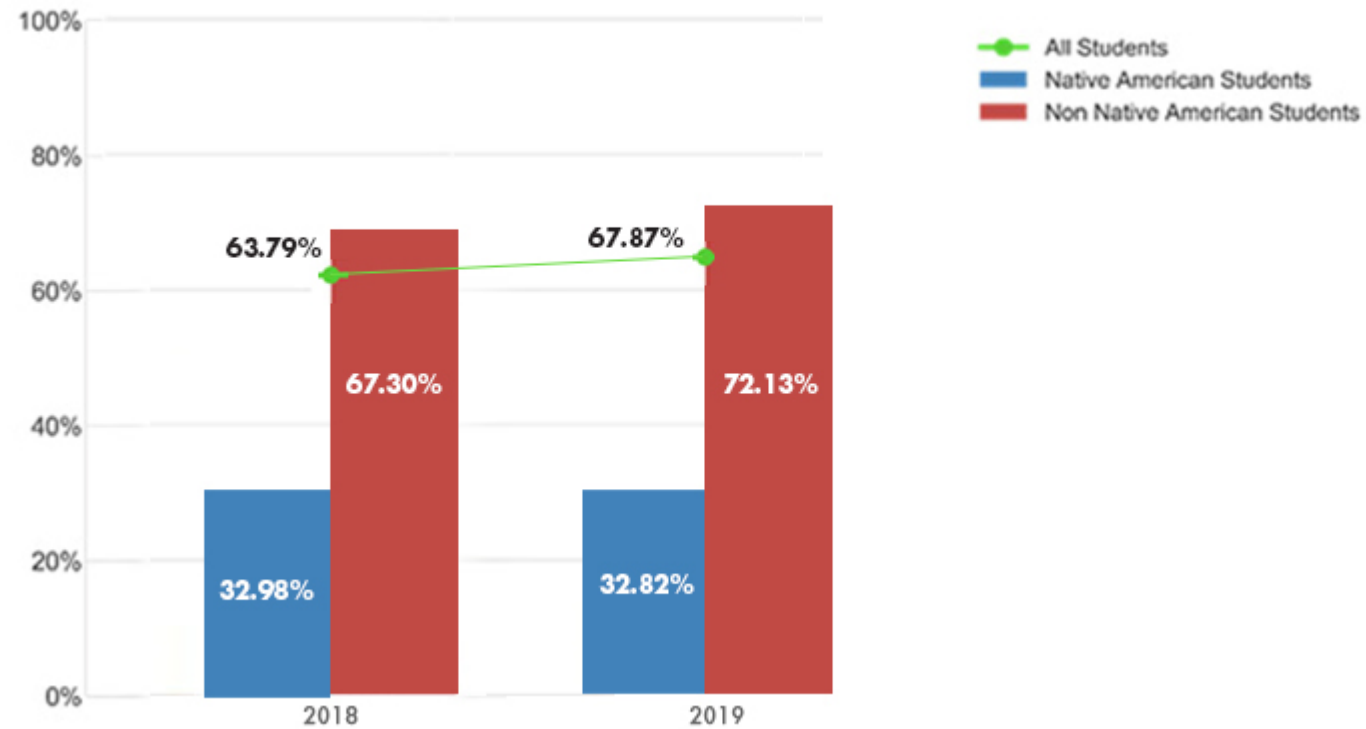

How we measure progress: Graduation Rate

3rd Grade Reading: Level 3

- Use **explicit details** and information from texts of moderate complexity to **support answers** or basic inferences.
- Identify or **summarize central ideas, key events, or sequence of events** presented in texts of moderate complexity.
- Determine **intended meaning of words** through context, relationships, structure, or resources in texts of moderate complexity.
- **Interpret and explain** inferences and author's message and **distinguish point of view** in texts of moderate complexity.
- Specify and **compare or contrast** relationships **across texts** of moderate complexity.
- Demonstrate knowledge of text structures or text features to **obtain, interpret, explain, or connect information in texts** of moderate complexity.
- Interpret use of language by **distinguishing literal from non-literal meanings** of words or phrases used in context in texts of moderate complexity.

Sample Question: 3rd Grade

The screenshot shows a digital test interface. On the left, a passage titled "Treasure in the Field" by Marilyn Bolchunos is displayed. The passage describes a man and his two young sons on a farm in Vietnam. The man had to tend the field, so the boys took care of the house. One day, the father returned home to find nothing had been done—he even had to cook dinner. He asked his older son, "What have you been doing all day, Ta?" and the son replied, "Studying, Father, and thinking."

On the right, a question box is shown. It has a search icon and a "Zoom Out" button in the top right corner. The question number "2888" is displayed in a grey box. The question is titled "Part A" and asks which statement about the boys is supported by the passage. There are four multiple-choice options: (A) The boys did not share the work equally, (B) The boys did not know how to plant a field of rice, (C) The young boys wished to surprise their father with a special dinner, and (D) The young boys preferred to sit in the house instead of working outside. Below this, "Part B" is shown, asking which sentence from the passage **best** supports the answer in part A. The first option for Part B is (A) The sons promised and hurried out to begin.

Read the passage and answer the questions.

Treasure in the Field
by Marilyn Bolchunos

Once there was a man who lived with his two young sons on a farm in Vietnam. Since the man had to tend the field, the boys took care of the house. That is, they were supposed to take care of the house.

Often the father returned home to find that nothing had been done—he even had to cook dinner.

"What have you been doing all day, Ta?" he would ask his older son.

"Studying, Father, and thinking," Ta would reply.

2888

Part A

This question has two parts. First, answer part A. Then, answer part B.

Which statement about the boys is supported by the passage?

(A) The boys did not share the work equally.

(B) The boys did not know how to plant a field of rice.

(C) The young boys wished to surprise their father with a special dinner.

(D) The young boys preferred to sit in the house instead of working outside.

Part B

Which sentence from the passage **best** supports your answer in part A.

(A) The sons promised and hurried out to begin.

11th Grade Reading: Level 3

- Cite adequate textual evidence to support most inferences made or conclusions drawn about texts of moderate complexity.
- Summarize themes and some analysis of thematic development over the course of the text using relevant details.
- Determine intended meanings of most words, including distinguishing connotation/denotation, figurative language, and words with multiple meanings based on context, word patterns, word relationships, etymology, or use of specialized resources.
- Apply sufficient reasoning and a range of textual evidence to justify most inferences or judgments made about texts.
- Adequately analyze interrelationships among literary elements within a text or multiple interpretations of text (including texts from the same period with similar themes, topics, or source materials).
- Partially analyze text structures, genre-specific features, or formats (visual/graphic/auditory effects) of text and explain the impact(s) of those choices on meaning or presentation.
- Partially analyze the figurative (e.g., euphemism, oxymoron, hyperbole, paradox) and connotative meanings of words and phrases used in context and the impact(s) of those word choices on meaning and tone.

Sample Question: 11th Grade

[About This Item](#) [More Like This](#) [Share](#) [Accessibility](#)

Read the text. Then answer the questions that follow.

Moving to the Back of Beyond

When my parents said the three of us were moving out to California, to a place just north of Los Angeles, my mind immediately went to thoughts of Disneyland and Hollywood, glitz and glamour. I imagined a Rodeo Drive shopping spree to pick out a bikini for the endless days I would be spending on the beach. However, I'd forgotten about my parents' penchant for the unconventional; they're definitely "the road less traveled" kind of people. Mom had a gopher snake for a pet when she was younger, and Dad was never happier than when he was climbing near-vertical cliffs that only mountain goats could love. These are not city folk.

They had chosen to buy a 900-square-foot cabin under a

3093

Click the **two** sentences that **best** support the inference that the narrator's expectations before the move were based on a kind of fantasy.

When my parents said the three of us were moving out to California, to a place just north of Los Angeles, my mind immediately went to thoughts of Disneyland and Hollywood, glitz and glamour. I imagined a Rodeo Drive shopping spree to pick out a bikini for the endless days I would be spending on the beach. However, I'd forgotten about my parents' penchant for the unconventional; they're definitely "the road less traveled" kind of people. Mom had a gopher snake for a pet when she was younger, and Dad was never happier than when he was climbing near-vertical cliffs that only mountain goats could love. These are not city folk.

3rd Grade Math: Level 3

- Select the appropriate operation to **solve one-step problems** involving **equal groups and arrays**.
- Use the **properties of operations** to multiply within the **10 by 10 multiplication table**.
- **Fluently multiply within 100**.
- **Solve two-step problems** using **addition and subtraction** with **numbers larger than 100 and solutions within 1,000**.
- Represent a **fraction** on a **number line with partitioning**.
- **Estimate liquid volumes and masses of objects** using standard units of grams, kilograms, and liters.
- **Find the area of a rectilinear figure** by multiplying side lengths and by decomposing a rectilinear figure into non-overlapping rectangles and adding them together.

Sample Question: 3rd Grade

3431

Jack has 24 fish. He puts them into 4 bowls. Each bowl has an equal number of fish.
How many fish are in each bowl?

7	8	9
0	.	$\frac{\Box}{\Box}$

8th Grade Math: Level 3

- Solve simple quadratic monomial equations and represent the solution as a square root.
- Work with and perform operations with scientific notation of large numbers.
- Identify unit rate of change in linear relationships (i.e., slope is the rate of change).
- Solve linear equations with rational number coefficients, including equations whose solutions require expanding expressions using the distributive property and collecting like terms and equations with infinitely many solutions or no solution.
- Solve a system of linear equations with integer coefficients using an algebraic strategy.
- Classify functions as linear or nonlinear on the basis of the algebraic representation.
- Determine the rate of change and the initial value of a function.
- Compare properties of two linear functions represented in different ways (algebraically, graphically, or in a table).
- Predict the location of point P after a transformation.
- Construct rotations of figures in a coordinate plane

Sample Question: 8th Mathematics

Based on the graph, determine whether each statement is true. Select True or False for each statement.

Typical Questions

How often do we test kids?

SDCL 13-26-1.1 limits the state's assessment to be less than 2% of total instructional time. We are under 2% allowed. However, many schools mandate interim assessments of their own choosing each semester. Our new state contract makes this interim assessment available to districts for free. Students take the English and Math assessment in grades 3-8 and grade 11. Students take the Science assessment in grades 5, 8, and 11.

Do we require all students to take the SD Assessment?

Yes. Federal law requires all students do so and we must hit the 95% benchmark. Special education students take the tests and states are allowed to have 1% take an alternate test. English learners take the assessment.

How much does the South Dakota Assessment Cost?

We have a six year contract with American Institutes for Research for \$12.1 million. The school districts are provided this at no cost.

Are we still teaching Common Core?

No. South Dakota educators modified the standards in Math and ELA in 2018. These new standards are being taught for the first time this year and will be tested this spring. We are in the "Smarter Balanced" Consortium for Math and ELA.

So why don't students do better?

1. “The Knowledge Gap” plays a significant role.

The distinction of teaching the standards or *teaching to the standards with high quality curriculum*

The fifty seven words that teachers, curriculum directors, administrators and school board members need to know: “By building knowledge in history/social studies, science, and other disciplines students build a foundation of knowledge in these fields that will also give them the background to be better readers in all content areas. Students can only gain this foundation when the curriculum is intentionally and coherently structured to develop knowledge within and across grades.”

The Skills based standards were always meant to be complemented by knowledge rich curriculum

2. The “Opportunity Gap”

Work group created, is meeting and working on recommendations

3. The challenges outside the school:

- mental health, and drug use and so Department of Education is playing an active role in Governor Noem’s Suicide Prevention work, Meth awareness campaign, mental health, and school safety initiatives.

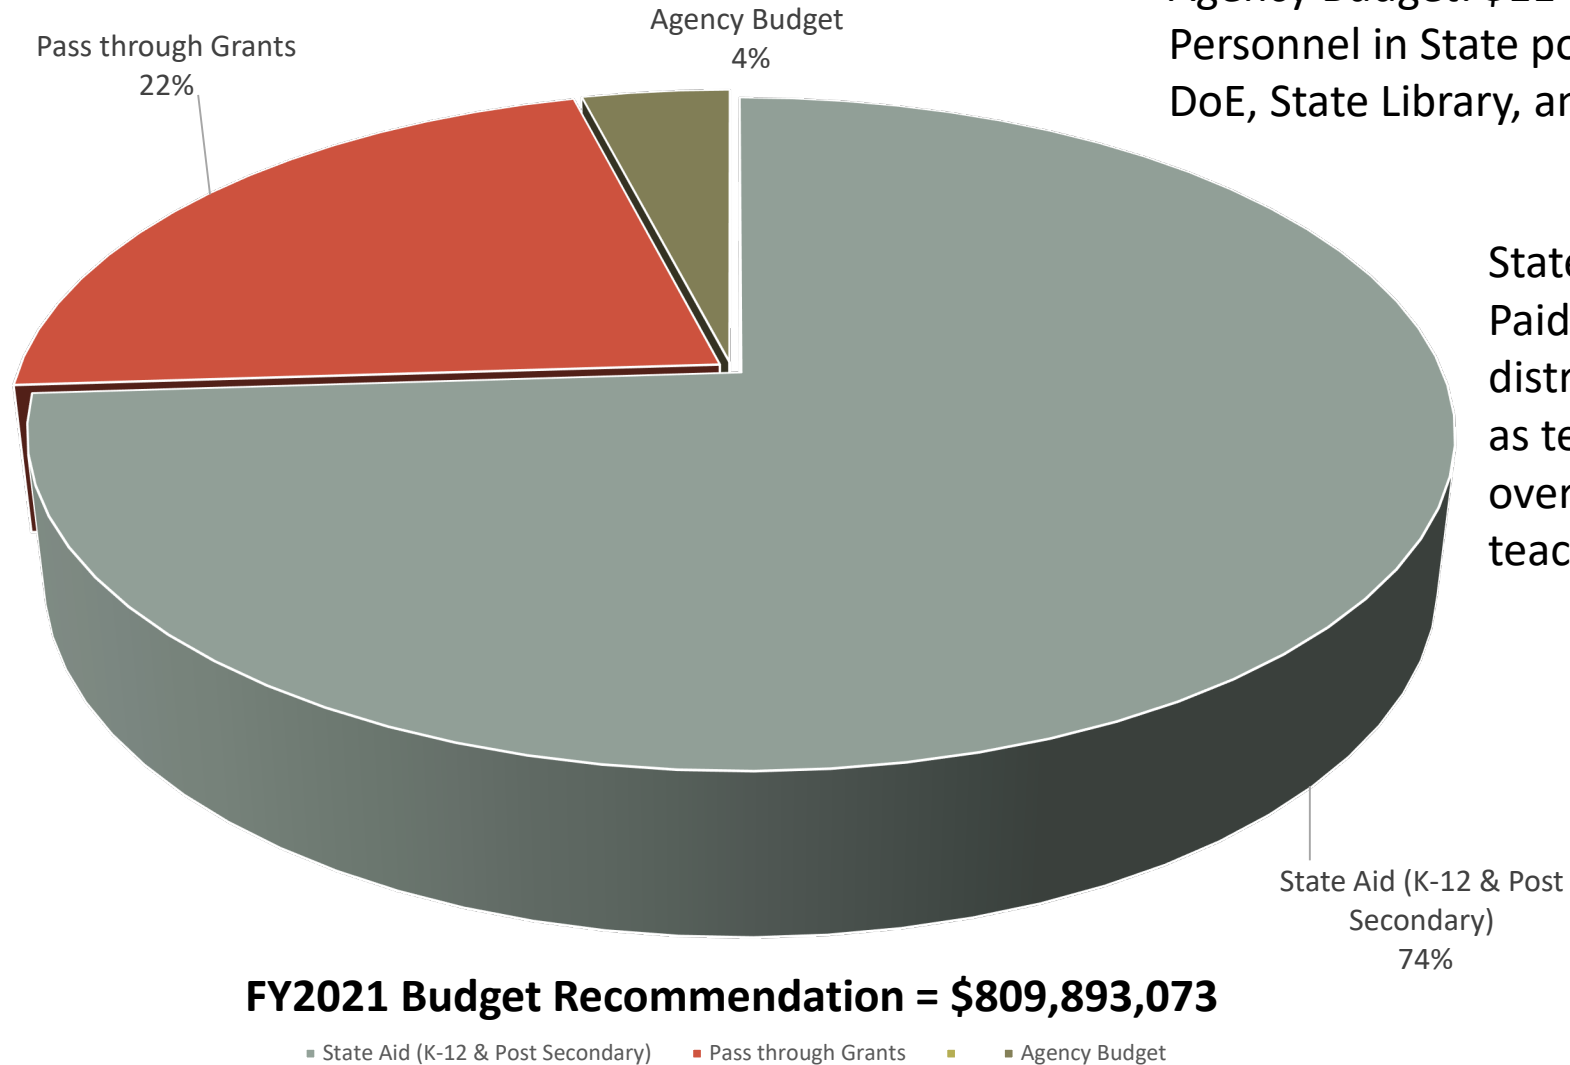

Dept of Education's Budget

- The Department of Education distributes state aid to school districts. No school performance metric is tied to the disbursement of state aid.
 - *74% of total budget.*
- The Department of Education is also a “pass through” agency for federal grant funding for a wide variety of support to schools.
 - *22% of total budget.*
- The remaining 4% pays for staff and the programming to support creating academic standards, accreditation, teacher certification, state library, history, etc.

Department Budget

Pass through Grants

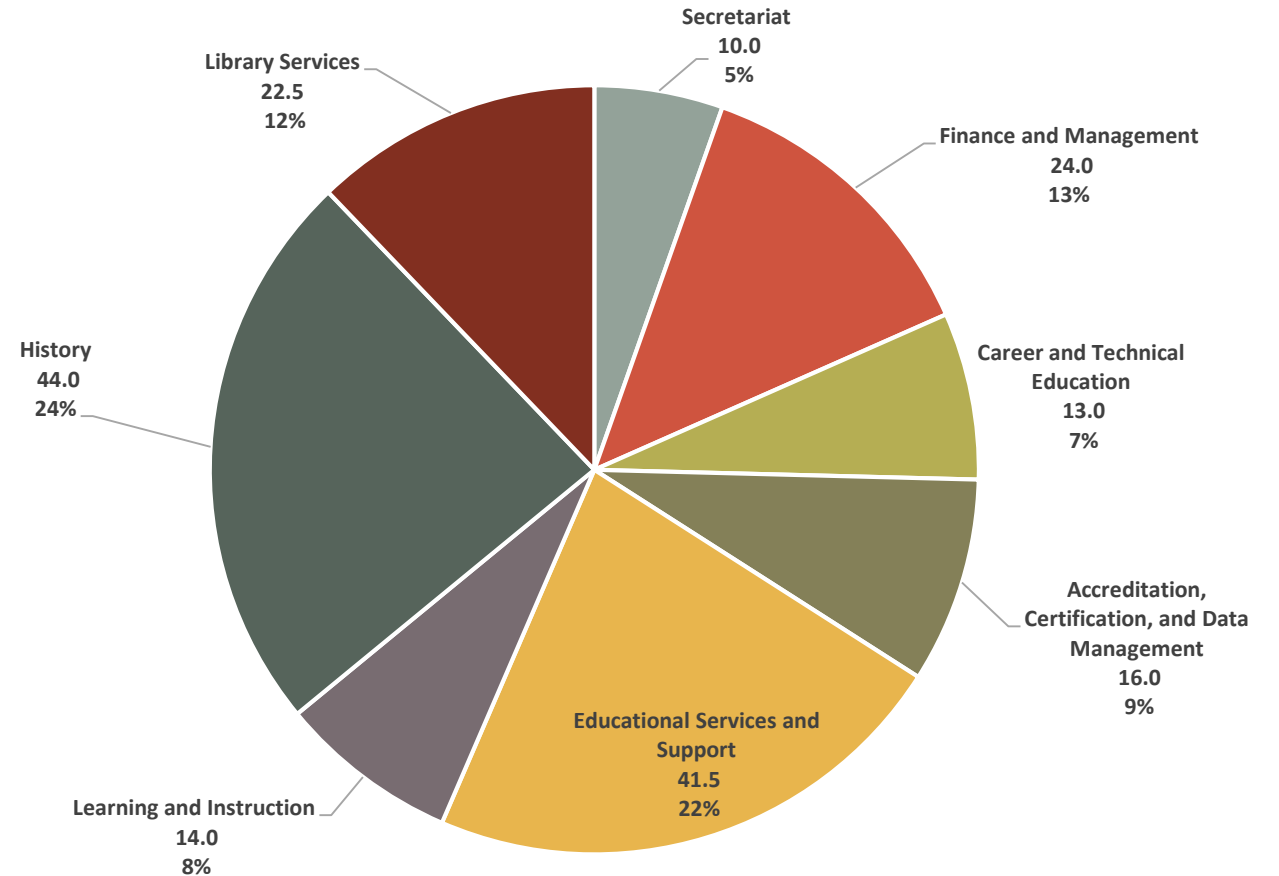

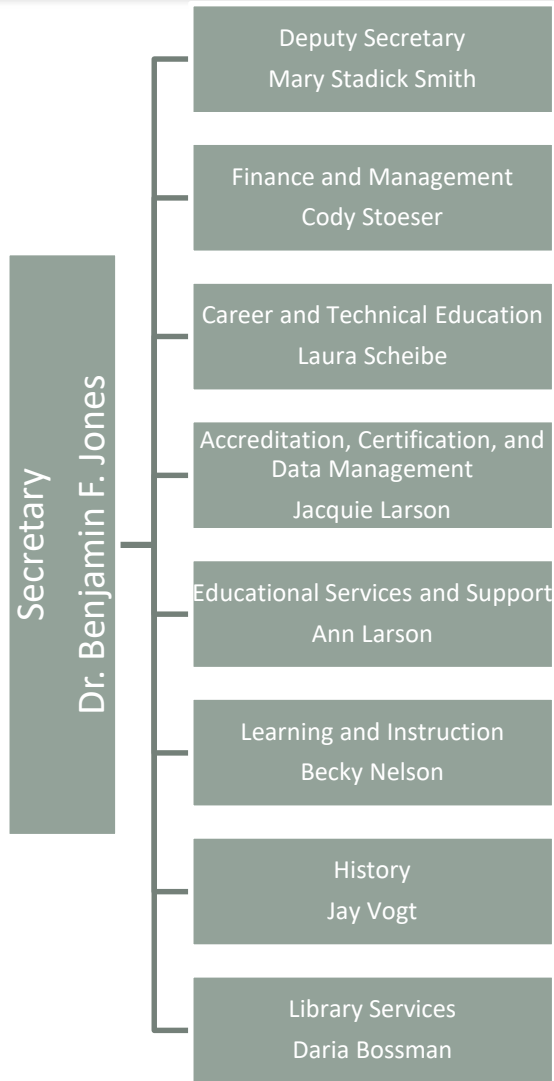

- Federal Special Ed
- School meals
- Title I support

Agency Budget: \$11 million in General funds
Personnel in State portion of
DoE, State Library, and Historical Society.

State Aid:
Paid to the 149 school
districts to cover such costs
as teacher salaries,
overhead, technology,
teacher mentorship

FY2020 Department FTE

Perkins Report Card

Perkins V requires states to publish Perkins accountability data in an accessible, easy-to-understand format. The development and maintenance of this system will serve multiple goals:

- Better aligning career and technical education with other department objectives and reporting;
- Streamlining the public's ability to find all accountability data the department produces and therefore increasing transparency;
- Meeting the federal requirement to provide Perkins data in an easily-accessible format;
- Building upon the investment made in the Every Student Succeeds Act Report Card.

Dual Credit Data Management System

The data management system for dual credit will include information such as: enrollment, performance, and billing data. The system would address these major areas:

- Increase data quality
- Effective and efficient reporting of dual credit data
- Connection to other department data sources, including Infinite Campus, National Student Clearinghouse, and Perkins
 - A connection to the other data sources would allow for ongoing evaluation of the state supported dual credit system
