

SPL State Owned Dams for M&R

The list below is modified from the 2016 list for dam repairs. Repairs at Richmond were completed so it was removed from number 1. Elm Lake is the top priority and is a special appropriation bill included in the Governor's budget for this year. The remaining funds from the previous appropriation will be used for any preparation work at Elm and projects at Leola and Osceola dams that have significant matching funds from local partners. If any funds remain additional crack sealing could still be completed for a minimal cost on the next dams on the list. The remaining dams listed below the double line are for informational purposes only.
