The fall enrollment used for the determination of the target teacher ratio for a school district may not include any students residing in a residential treatment facility when the education program is operated by the school district;

- (2D) "Limited English proficiency (LEP) adjustment," is calculated by multiplying 0.25 times the number of kindergarten through twelfth grade students who, in the prior school year, scored below level four on the state-administered language proficiency assessment as required in the state's consolidated state application pursuant to 20 USC § 6311(b)(7) as of January 1, 2013;
