HAND DELIVERED

The Honorable Spencer Gosch
Speaker of the House
500 E. Capitol Avenue
Pierre, SD 57501

RE: HR 7001

Dear Speaker Gosch:

Pursuant to instructions by Governor Noem, as Cabinet Secretary for the South Dakota Department of Public Safety, I am providing you with an external hard drive containing the investigative materials relating to the crash that occurred in Hyde County on September 12, 2020. During this crash, Attorney General Jason Ravnsborg struck and killed Joseph Boever.

The investigators' conclusions as to the events of that evening, which were based on the evidence contained in the materials I am providing to you, were challenged publicly by Mr. Ravnsborg prior to entering into his plea agreement. In doing so, Mr. Ravnsborg, while still serving as the attorney general, made a number of assertions that disparaged the work and reputation of the law enforcement agencies involved in this investigation. On behalf of all the law enforcement personnel involved in this investigation, I categorically reject Mr. Ravnsborg's characterizations.

In my opinion as a 24-year law enforcement officer, and in the opinion of the highly trained highway patrol officers involved in this investigation, Mr. Ravnsborg should have been charged with 2nd Degree Manslaughter. The prosecution team was well aware of that position. The South Dakota Highway Patrol stood ready and willing to provide expert testimony regarding the crash and the facts of this investigation at trial, a position that was also made clear to the prosecutor.

Politics never entered into this investigation. The law enforcement officers and professionals involved in this investigation, which also included experienced personnel from North Dakota, Minnesota, and a crash reconstruction expert from Wyoming, did so with the highest levels of professionalism. As you will see from the investigation materials, which are summarized below, our team investigated all leads, thoroughly collected evidence, spoke to dozens of possible witnesses, and examined all possibilities. This investigation was done correctly by all involved.

Immediately below is an annotated table of contents for the investigatory file. The full file is being provided with the understanding that you will limit any further distribution to only those individuals directly involved in your impeachment process. As you will see, the information I am providing contains only minimal redactions, which in each case encompass either other open investigations or security matters unrelated to the Ravnsborg crash investigation.
